

Environmental information on packaging

Officine Metallurgiche Cornaglia S.p.A.

Cornaglia S.p.A. is committed to the responsible management of the packaging used in its production processes, promoting the correct disposal of materials in accordance with the principles of separate waste collection.

This page provides environmental information relating to the packaging used for the handling and delivery of components intended for the automotive sector.

Composition of the packaging

Packaging component	Material	Identification code	Disposal instructions
Boxes and containers	Corrugated cardboard	PAP 20	Paper collection
Protective film / cellophane	Polyethylene (PE-LD)	LDPE 4	Plastic collection
Strapping bands	Polypropylene (PP)	PP 5	Plastic collection

Instructions for proper disposal

Before disposal:

- ☐ separate the different packaging materials;
 - ☐ remove any foreign matter;
 - ☐ check your local council's guidelines on separate waste collection.
-

Environmental commitment

Cornaglia S.p.A. operates in the automotive sector, developing technological solutions for components and systems for the mobility sector, with a focus on production processes and environmental sustainability.

Proper management of packaging makes a tangible contribution to reducing waste and recovering raw materials.
